

EXHIBIT “A”

Declaration Attesting to the Accuracy of the English Translation

I, Daniel Rowden, declare as follows:

1. I hereby certify that I am competent to translate from Italian into English. Based upon my education, training, skill, and experience, I believe that I am capable of accurately translating documents written in Italian into written English. My qualifications are as follows:

- BA (Hons) in Italian Studies inc. Italian language and linguistics.
- Lived in Italy for a year
- 12 years professional experience as a translator, over 1 million words on a variety of subject matter and media.

2. Accompanying this Declaration is a Product Chain Traceability Certificate, which I recognize as being written in Italian. I hereby certify that I prepared the translation the English translation of the foreign language document that accompanies this Declaration. To the best of my knowledge and belief, based upon my education, training, skill, and experience, the attached translation is an accurate translation from Italian into written English.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct. I declare under penalty of perjury that all statements made herein of my own knowledge are true and all statements made on information and belief are believed to be true, and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment or both, under Section 1001 of Title 18 of the United States Code.

PRODUCT CHAIN TRACEABILITY CERTIFICATE

CERTIFICATO N°
CERTIFICATE N°

0700010

ver. 04 of 01/26/2016

UNI EN ISO 22005:2008

L'ORGANIZZAZIONE:
OF THE COMPANY

COOP SOLANIA SRL

REGISTERED OFFICES: VIA PROVINCIALE 40, 84010 SAN VALENTINO TORIO (SA)

PRODUCTION SITE: VIA PROVINCIALE 40, 84010 SAN VALENTINO TORIO (SA)

OBJECTIVES: To ensure that the tomatoes are Campanian in origin, to enable quick and timely identification of batches and the quality of the sold product to all customers in order to facilitate any withdrawal and/or recall of product batches from the customers, to meet customer specifications.

IL PRODOTTO:
THE PRODUCT

TINNED

PEELED TOMATOES

NEL RISPETTO DEI SEGUENTI REQUISITI:
WITH RESPECT OF THE FOLLOWING REQUIREMENTS

BACKGROUND: From the growing of the Kiroso and San Marzano 2 varieties of tomatoes in the fields up to their processing into peeled tomatoes.

SCOPE: tomato, tomato juice, salt, primary packaging, citric acid, basil.

The following elements are excluded from the traceability scheme: the peel and seeds of the processed product.

Minimum traceable unit: DDT; 500 gr, 1 kg, 3 kg jars

TRACED ELEMENTS: Varieties of the Kiroso and San Marzano 2 tomato, cultivated plots, phytosanitary treatments, fertilization, picked and assigned batches of tomatoes, batches for processing, sales.

The validity of this certificate is subject to the continual compliance with Bioagricert Certification Regulations and the monitoring results.

Modalità di Immissione dei prodotti sul mercato • *Condizione to put products on the market:*

- a) Le transazioni fra operatori controllati, di prodotti non preconfezionati, devono essere sempre accompagnate dal "documento transazione prodotti biologici" (DTPB) che ne dichiara la conformità alla norma di riferimento e garantisce la regolare informazione a Bioagricert. Qualora il DTPB sia emesso dopo la transazione, la dichiarazione di conformità deve essere riportata sui documenti di vendita.
- The "Transaction Document of organic products" (DTPB), which declares the conformity with the reference standard and ensures regular information towards Bioagricert, should always accompany the transactions between controlled operators. if the DTPB is issued after the transaction, the declaration of conformity shall be reported on the sales documents.
- b) I prodotti preconfezionati possono essere messi in commercio solo dopo l'approvazione dell'etichetta da parte di Bioagricert e sono identificate dal codice di controllo.
- Prepacked products can be put on the market only after Bioagricert approves the label and after they are identified with a control code.

I certificati e le transazioni possono essere verificati via web su www.bioagricert.org e www.trasparento-check.com secondo le modalità previste sui siti. The certificates and the transactions can be checked via web on www.bioagricert.org and www.trasparento-check.com as indicated on the sites.

L'operatore è responsabile dell'immissione sul mercato dei prodotti e delle dichiarazioni di conformità. • The operator is responsible for putting products on the market and for the conformity statements.

Presentation of the organization and the supply chain under audit:

The company carries out the industrial processing of tomatoes. The supply chain consists of farms which industrially farm varieties of San Marzano 2 and Kiros native to Sarnese Nocerino for indeterminate growth. The individual producers give the produce from the plots in the supply chain agreement to the leader.

Traceability ISO 22005	AUDIT REPORT	Master 102

ANNEX A

LG 12:	REQUISITE/DESCRIPTION	C/NC/NA	NOTES/INDICATIONS
PRE-REQUISITES AND REQUISITES FOR PRACTICE			
-	Health approvals, notice of commencement of business, enrolment to the chamber of commerce.	C	
-	Applicable mandatory legislation (hygiene package).	C	
	If water is used in the production process, indicate its origin. In the event that well water is used, does the company have an analysis plan in place as stipulated by sectoral legislation?	C	For water coming from wells, analysis is carried out each year in consideration of report 153/2018/ACQP of 6/18/18
SUBJECT OF THE SYSTEM			
2.2	Does the system reference product or component certification?	C	Product certification
2.2.	If, within the company, there are certified and uncertified products, are the two products be clearly distinguishable? Indicate how they are identified.	C	Presents identification of the certified raw materials and all processing phases, the finished product is identified as being in storage. Presents procedure 3 dated 6/22/2012 ver 01
OBJECTIVES OF THE TRACEABILITY SYSTEM			
2.3	Results that the Organization aims to achieve by applying the traceability system: are the reported objectives verifiable and applied?	C	Presents the 2018 MRF objectives plan Annex 12 ver. 01
SCOPE OF THE SYSTEM			
2.4	State the extent of the system, indicating the supply chain's beginning and end points/stages.	C	start of the supply chain: the farm, end of the supply chain: sale of the processed product
PRODUCTS AND INGREDIENTS			
2.5	Have the relevant components been identified (raw materials, ingredients) to which the traceability of the material flows, the responsibilities and the monitoring are applied?	C	Batches of San Marzano 2 and Kiroso processed into peeled tomatoes in various formats, ancillary components citric acid, basil. Relevant components tomatoes, tomato juice, salt and primary packaging
2.5	Have the ancillary components (additives, processing aids, spices, etc.), to which only the traceability of responsibilities is applied, been identified?	C	Citric acid, basil
2.5	Exclusion of components Do any of the products excluded from the traceability system compromise the objectives from being achieved and compliance with health and safety requirements? <i>Note: in the event that relevant components are excluded, the exclusions must be clearly shown and made known to the customers of the organization holding the certification in an appropriate manner, specifically including on the product labelling.</i>	NA	No exclusions

Traceability ISO 22005		AUDIT REPORT		Master 102	
LG 12	REQUISITE/DESCRIPTION			C/NC/NA	NOTES/INDICATIONS
SYSTEM ELEMENTS					
2.6	Is each traced element related to specific objective (assess)?			C	Present an objective for the main elements of the system, complete with measurable KPIs, for example objective no. 4; efficiency of the traceability system, KPI time and internal test target 40 minutes, calculated 30 minutes Objective no. 1 target 100% of the batches traced
2.7	Has the organization identified the MTU for each product (specify)?			C	Box of end product
PHASES OF THE PROJECT					
3.1.1	POSITION IN THE SUPPLY CHAIN: Has the organization at the least identified its suppliers and customers, depending on its position in the supply chain?			C	The organization is placed at the end of the supply chain
3.1.1	Exclusions of phases of the supply chain (only applicable to supply chain traceability) Has the organization excluded any phases of the supply chain? <i>Note: If the primary phases are excluded, it is forbidden to use expressions such as breeding, field, farm and their synonyms, or expressions that give the impression that primary production is an integral part of the certified system, in the certificates and in the commercial and promotional use of the certification.</i> <i>Note: In the case of animal supply chains, the location at the start of the supply chain may be different from that where the animals are born, it being understood that, in this case, the amount of time that the animal was at the location at the start of the supply chain must be significant for its life. In these cases, the method of animal husbandry must be shown on the certificate</i>			C	No phases excluded
3.1.2	MATERIAL FLOWS The organization has documented the material flow under its control (flow diagrams and description, client/supplier relationship, indication of who is to be entered into the agreements, the activity performed, the phases, the units of the material, the tracked elements, the supporting evidence for the traceability, identification of the batch). <i>Flows must be identified by type, quality and quantity.</i>			C	Defined the flows of the materials involved and the monitoring system implemented
PHASES OF THE PROJECT					
3.1.3	INFORMATION REQUIREMENTS - in accordance with its objectives and its position in the supply chain, the organization prepares the information it is required to receive from its suppliers, that it must provide its customers, and which is to be collected concerning the product and its processing.			C	Defined the information flows from the farm phase to the processing and marketing stages
3.2	PREPARATION OF PROCEDURES: have the stipulated procedures for implementing the traceability defined in the DT (for example product definition, batch, identification, management and recording methods, information gathering methods, etc.) been applied? Are the treatment of non-compliance and the corrective measures of the traceability system included in the procedure?			C	Presents procedure in support of the DI, i.e. traceability procedure Pr 2 ver 01
3.2	Are adequate records kept in relation to batch/product identification?			C	Verified within the framework of the traceability test

Traceability ISO 22005	AUDIT REPORT	Master 102
------------------------	--------------	------------

LG 12	REQUISITE/DESCRIPTION	C/NC/NA	NOTES/INDICATIONS
	Do the records allow for the flow of information between the raw materials and the products?	C	
3.2	In the case of the supply chain, is the DT distributed by the organization at the top of the supply chain shared and accepted and a copy retained in a controlled way by each organization?	C	List of distribution documents attached. ver. 00 updated 5/10/2018
3.3	Document management and control (document control procedure), documents are approved, in the interest of appropriateness, before they are issued; are they reapproved in the event of revision?	C	
3.3	Are the documents available those stipulated in the latest review, are the reasons and the status of the revisions identified?	C	
3.3	Are the documents showing the latest revisions present in the workplace and are they easily legible and identifiable?	C	The procedures for the management of responsible activities are available in the companies in the supply chain: traceability manual and workbook seen at farm
3.3	Are the superseded documents correctly archived and identified?	C	
3.3	Management and control of records (document management procedures), are methods required for the correction, identification, archiving, protection, discoverability, the duration for which they are retained, and the methods for the deletion of records implemented?	C	
3.4	Coordination of the food and foodstuff supply chain if an organization is part of a traceability system with other organizations, has a manager been identified to coordinate the traceability project.	NA	
IMPLEMENTATION			
4.1	Implementation of the general aspects - are the available resources sufficient for maintaining a traceability system.	C	Presents elements and documents constituting the traceability system
4.2	The traceability plan implemented by the company is consistent with the activity carried out and all of the phases concerning the organization have been considered	C	The traced elements are congruent with the company's operations in relation to the production of processed tomatoes
4.2	The application and compliance with the traceability plan (monitoring, self-regulation, preventative and corrective action, records) is evident from the documentation produced by the organization.	C	The organization has established a system of inspections for the farms in the supply chain and internal verification of the system, seen Annex 10 for 2018 for farms and for the processing phase
4.3	The organization has defined tasks and responsibilities to personnel involved in the traceability system.	C	Defined responsibilities for each stage of the supply chain

Traceability ISO 22005	AUDIT REPORT	Master 102
------------------------	--------------	------------

4.4	The training plan drawn up by the organization is applied (documented training and educational activities). State the individual who conducted the training; method; date. Are training activities documented?	C	Training of growers carried out on 5/10/18 and 5/28/18, on 7/20/18 for plant employees
--	A product withdrawal/recall procedure is available.	C	Procedure no. 4 of 9/30/2016 tests carried out on 9/28/2018 - batches A209-A223-A238
4.6	Performance indicators - the organization measures the efficiency of, and deviation from, the stated objectives of the traceability system. Each objective stated in the DT is linked to performance indicators.	C	Presents analysis of objectives with analysis of performance indicators, Annex 2 ver 01
5	The organization carries out internal audits at least every 12 months, inspections to evaluate system efficiency. The inspections are documented.	C	Seen internal inspection report, self-inspection checklist during production on 08/04/2017
6	Review - The organization carries out reviews and provides to take adequate corrective action at appropriate intervals and reach time there are any changes (state the aspects included in the review).	C	Review dated 9/28/2018 input: traceability test, presence of NC or complaints relating to ISO 22005, audit of third parties and customers, evaluation of objectives for 2018, output: training plan, issuing of a new objectives plan.
--	The measuring tools and the equipment undergo maintenance and calibration if requested by the DT.	C	Presents calibration plan for internal equipment

Note:

ANNEX TO MASS BALANCE (loading-unloading)
Campaign 201

Raw material checked: Kiros and San Marzano 2 tomatoes

Monitoring period from (a)

to (b) Production
2018

Total RM input in the period in question (a-b): 8884809 kg

Products created starting with the inspected raw material:
2018

Warehouse stock (RM, SL, PF inspected)

Sales to -> b

Products	Quantity (kg)	Yield	RM / SL / PF	Stock (kg) at period start date (a)	Stock (kg) at period end date (b)	RM, SL, PF monitored	Quantity (kg)
